EXPERIENCE

AMRIT WEB | FULL STACK DEVELOPER

11/2020 - 04/2021 | Chandigarh

- Developed the client side, admin side and server side interfaces of an e-commerce website. Customers can search for items, see details of an item, and can place an order. Users have to sign up and the login for shopping. Admin can see the users registered, accept or reject their account and also can keep a check on the products and offer and can edit as well. Developed a service section as well where user can book a service and admin assigns that service to the employee. Employees also can make their account with employ category. Users can also contact and mail on the MailId created separately for website. Name of the website - Shopping Hotspot.
- Tech Stack** - HTML, CSS, Bootstrap, JS, SQL, AJAX, jQuery, .NET.

PROJECTS

USER LOGIN AND SIGNUP | REACT, NODEJS, CSS, BOOTSTRAP, EXPRESS, MONGODB

- Developed a MERN stack application where users can login and sign up and data is persisted in a MongoDB database.

SUDOKU GAME | HTML, CSS, JAVASCRIPT

- Developed 9*9 sudoku game.

WEATHER APP | HTML, CSS, JAVASCRIPT

- Developed an app which gets you the temperature and weather of city entered, using open weather api.

SWIGGY COVER PAGE | HTML, CSS, JAVASCRIPT, BOOTSTRAP, REACT

- Developed swiggy home page clone using react components. It is made responsive whereas original swiggy page is not responsive.
